High Precision Embroidery Machine

Science and technology constitute a primary productive force, its updating makes the development of mechanical industry move forward. YUEMEI keeps up with the times, innivating old techniques and importing new automatic equipments, brings out brand-new high precision models on the basis of mature high speed machine technology. HP machine will be a sharp weapon in embroidery industry which would not only give higher production efficiency but also improve stitch quality. The embroidery industry has entered high speed age. YUEMEI high precision machine becomes very popular once it goes to market, especially in garment markets such as Turkey and Portugal.
